Online Manual

Table of Content:

1. Manual

2.Kommandline

3.Version

4.Usability

1.Manual

To use the Manual Please Read the Table of Contents at first then go to the Secion you want to search for.

2.KommandoZeile

Make the Program Executable with chmod +x (Name of the Program) .

To get help run --help
To see the Version of the Virtual Machine –version
To debug use –debug then the Name of the Program you want to Debug
by debug you got many options like step ,list ,inspect and more

Please Assure that you use the nja version 4 as Assembler.

3.Version

This is the Manual for the Fourth Version of the Ninja Virtual Machine .
You can do many Progras with it , its contains Jumps calls lokal and global Variables and much More.
BUT there is still no Array ,maps and few other things.

4.Usability

 This Virtual Machine is used to run Files that is Assembled from the Ninja Assembler .
Just put the File after ./njvm and run it.
